

ONELAN

Net-Top-Box (NTB) Overview

The ONELAN NTBs are a range of digital signage players capable of powering anything from the simplest welcome screen to the largest video wall installation.

Why choose a ONELAN Net-Top-Box?

- ◆ 24/7 reliability - Linux network appliance
- ◆ Low maintenance, no virus protection or 3rd party software required
- ◆ Easy to use multilingual web browser interface
- ◆ Highly scalable - manage 1000s of endpoints
- ◆ Centralised content creation with advanced conditional play

*Not all content types are supported on all players. Please check player datasheets for more details

NTBs are available in three configurations depending on their intended usage:

- ◆ **Publisher (P)** - Primarily designed to create layouts, playlists and schedules which can then be published to other NTBs on the network
- ◆ **Subscriber (S)** - this NTB pulls content from a ONELAN Publisher NTB or Enterprise Content Management System (CMS)
- ◆ **Stand Alone (SA)** - this NTB is only able to create and display content on the display which it is connected to. It cannot subscribe or publish content

Andersen House, Newtown Road, Henley-on-Thames, RG9 1HG, UK
